Description

By: Delta, Beveled Edge. Grade: Cabin.

Cabin/Utility/Tavern Grade: This flooring product will have varying wood characteristics and colors to include streaks, deeper knots and burls, small splits, wormholes, and even marks during the milling process such as machine burns. It may also have a large variance in color and grain patterns. The boards are typically 10" to 30" with an average board length of 16". It is usually packaged in mini bundles of 18-20 sf per bundle. It is ok for 5" wide to be heavier in shorter pieces. Cabin grade is a stable, installable product but please account up to 10%-20% waste.

A beveled edge floor, also known as Micro-Beveled edge, has strips or planks with a 1mm to 2mm 45-degree angle on the top edges of the board. Beveled Edge – features a larger, more pronounced edge detail. A full bevel edge is often combined with a sculpted or hand scrapped effect. This results in a stunning and authentic appearance. Micro-Beveled Edge – refers to a class of edge styles that have a very small bevel.

Please refer to the Documents tab under this product for additional hardwood flooring information.
